

Did You Know?
94%

Premier Odor Prevention Program

Surveys show that 94% of U.S. adults said they would avoid a business in the future if they encountered a dirty restroom.

MicroShield 360 is an advanced coating system that prevents microbes from living on a treated surface.

This includes odors caused by bacteria that are normally present in restroom facilities and mold that forms within showers.

DEEP CLEAN & SEALER

- Scrubbing and disinfection of all walls, flooring and fixtures
- Application of sealant – no texture or color added to tiles or grout

MICROSHIELD 360 COATING SYSTEM

- Electrostatic application of coating system
- Restroom no longer allows odors to exist on any treated surface

89%

Surveys show that 89% of U.S. adults said that odor is the leading sign of uncleanliness.

MicroShield 360 Odor Prevention Program

Process Overview

- 1 Proprietary Deep Clean and Surface Sealant
- 2 Application of MicroShield 360 Coating System
- 3 Routine Check-In's to Ensure Odor Control

EPA REGISTERED
FDA APPROVED*

"Issues with odors in restrooms affect client's perception and therefore can affect a business. We had an odor issue which we let MicroShield 360 address. We haven't altered our cleaning regimen and to this day there are still no odors. I would recommend this service to other restaurant owners."

Jennifer Short – Chief Operations Officer
